

7th Workshop on Quantum Chaos
and Localisation Phenomena

Warsaw, Poland, May 29–31, 2015

Editors of the Proceedings:

Leszek Sirko
Szymon Bauch

WARSAW

POLISH ACADEMY OF SCIENCES
INSTITUTE OF PHYSICS

The Conference was organized by:

Institute of Physics Polish Academy of Sciences,
Center for Theoretical Physics Polish Academy of Sciences,
Pro Physica Foundation

Organising Committee:

Szymon Bauch (bauch@ifpan.edu.pl)
Małgorzata Białous (bialous@ifpan.edu.pl)
Marek Kuś (marek@cft.edu.pl)
Michał Ławniczak (lawni@ifpan.edu.pl)
Paweł Masiak (pmasiak@ifpan.edu.pl)
Leszek Sirko – chairman (sirko@ifpan.edu.pl)
Vitalii Yunko (yunko@ifpan.edu.pl)

Objectives:

To assess achievements and to formulate directions of new research
on quantum chaos and localisation
To bring together prominent experimental and theoretical physicists who share
a common interest in quantum chaos and localisation phenomena

Scope:

Presentations will focus on the following topics:
Quantum chaos and nonlinear classical systems
Quantum and microwave billiards
Quantum and microwave graphs
Atoms in strong electromagnetic fields – experiment and theory
Chaos vs. coherent effects in multiple scattering
Anderson localisation
Random lasers
Quantum chaos and quantum computing
Entanglement and noise

Preface

The 7th Workshop on Quantum Chaos and Localisation Phenomena was held in Warsaw, Poland, May 29–31, 2015 in the Institute of Physics of the Polish Academy of Sciences. The Workshop was organized by the Institute of Physics of the Polish Academy of Sciences, the Centre for Theoretical Physics of the Polish Academy of Sciences and the Foundation “Pro-Physica”. The first of these biennial workshops was organized in 2003. The selected articles of the invited lecturers, starting from the second Workshop, were published in *Acta Physica Polonica A* [1–5]. The main objectives of the Workshops are the assessment of achievements and the formulation of directions of a new research on quantum chaos and localisation phenomena.

The Workshop gathered about 50 participants from Czech Republic, Germany, Israel, Italy, Poland, Russia, Switzerland, United Kingdom, and USA, representing experimental and theoretical physicists. Almost half of them were PhD students and postdocs. During the meeting 18 invited lectures and 5 posters were presented. The presentations were focused on the following topics: quantum chaos and non-linear classical systems, quantum and microwave graphs and billiards, atoms in strong electromagnetic fields, Anderson localisation, quantum chaos, quantum computing and physics of low dimensional systems. In the talks and poster presentations the theoretical and experimental problems from various fields of solid state, atomic and molecular, mathematical and statistical physics were discussed. It is worth to notice that this time majority of the lectures were devoted to many-body systems. The poster session as well as the coffee breaks and the conference dinner gave the opportunity for many interesting scientific discussions.

On behalf of the organizers we would like to express our gratitude to all speakers and the authors of the poster presentations for their contribution to the success of the Workshop.

We present the Proceedings of the 7 Workshop on Quantum Chaos and Localisation Phenomena in which 9 invited lectures are published.

The organizers acknowledge the financial support of the Ministry of Science and Higher Education.

Editors of the Proceedings,
Leszek Sirko
Szymon Bauch
