Preface

This special issue of *Acta Physica Polonica A* is dedicated to selected articles of the 6th International Conference on Computational and Experimental Science and Engineering (ICCESEN-2019) that was held in Kemer, Antalya, Turkey during the period of 23–27 October, 2019. ICCESEN, founded by Prof. Dr. İskender Akkurt, is a remarkable platform where both computational and experimental works in the fields of science and engineering are discussed, and shared. There were about 400 presented papers from about 40 different countries in ICCESEN-2019. All manuscripts were subjected to the peer review procedure. We appreciate all the authors and reviewers for their valuable contributions in order to achieve a publication of high scientific quality. We thank all invited speakers, scientific and organizing committee, and all participants from all over the world.

I am also thankful to Prof. Jan Mostowski (Editor-in-Chief of *Acta Physica Polonica A*) and his team for collaborating with us in publishing about 34 papers in this issue. I am looking forward to meet all again in future ICCESEN conferences (www.iccesen.org).

Prof. Dr. İskender AKKURT
Chair of ICCESEN,
Editor for Special Issue
