

## Note from the Editor

We must inform that the systematic technical error has been introduced into the compuscript of the paper:

Marek Moneta, Effective Ion Charge, *Acta Phys. Pol. A* 89, 581 (1996).

As a result, all the formulae and expressions containing exponential functions has been erroneously printed (in the form of  $e^{xyz}$  instead of  $e^{xy^z}$ ) throughout the whole paper.

For example:

$$\left. \begin{array}{l} c'_{mn}(t) = -i \sum_{kl} e^{i\omega_{mnkl}t} \langle mn|H_I|kl\rangle c_{kl}(t), \quad (2) \\ \text{should read} \\ c'_{mn}(t) = -i \sum_{kl} e^{i\omega_{mnkl}t} \langle mn|H_I|kl\rangle c_{kl}(t), \quad (2) \end{array} \right\}$$

The corrected version of this paper in the form of reprints is available upon request either from the Author or directly from our Editorial Office.

The Production Editor regrets his error and apologises to the Author and Readers.
